Phoenix Smart 12/50(1+1)

Bluetooth sensing:
Smart Battery Sense

Bluetooth sensing:
BMV-712 Smart Battery Monitor

Phoenix Smart 12/50(3)

Bluetooth Smart built-in

The wireless solution to set-up, monitor, control, update and synchronise Phoenix Smart IP43 Chargers.

Phoenix Smart (1+1): two outputs to charge 2 battery banks

The second output, limited to approximately 4 A and with a slightly lower output voltage, is intended to top up a starter battery.

Phoenix Smart (3): three full current outputs to charge 3 battery banks

Each output can supply the full rated output current. But the total of the 3 outputs combined can never exceed the current rating of the charger.

Automatic voltage compensation

The charger compensates for voltage drop over the DC cabling by slightly increasing output voltage when the DC current increases. Please see the manual for details.

Adaptive 6-stage charge algorithm: bulk – absorption – recondition – float – storage – refresh

The Phoenix Smart Charger features our well-known “adaptive” battery management system that can be preset to suit different types of batteries. The ‘adaptive’ feature will automatically optimise the charge process relative to the way the battery is being used.

The right amount of charge: variable absorption time

When only shallow discharges occur (a yacht connected to shore power for example) the absorption time is kept short in order to prevent overcharging of the battery. After a deep discharge the absorption time is automatically increased to make sure that the battery will be fully charged.

Preventing damage due to excessive gassing: the BatterySafe mode (see fig. 2)

If, in order to quickly charge a battery, a high charge current in combination with a high absorption voltage has been chosen, the charger will prevent damage due to excessive gassing by automatically limiting the rate of voltage increase once the gassing voltage has been reached (see the charge curve between 14,4 V and 15,0 V in fig. 2).

Less maintenance and aging when the battery is not in use: the Storage Mode (see fig. 1 & 2)

The Storage Mode kicks in whenever the battery has not been subjected to discharge during 24 hours. In the Storage Mode float voltage is reduced to 2,2 V/cell (13,2 V for a 12 V battery) to minimize gassing and corrosion of the positive plates. Once a week the voltage is raised back to the absorption level to ‘equalize’ the battery. This feature prevents stratification of the electrolyte and sulphation, a major cause of early battery failure.

Also charges Li-ion (LiFePO₄) batteries

Charger on-off control can be implemented by connecting a relay or open collector optocoupler output from a Li-ion BMS to the remote on-off port. Alternatively full control of voltage and current can be achieved with Bluetooth.

Fully programmable charge algorithm

The charge algorithm can be programmed with help of Bluetooth or the VE.Direct interface. Three preprogrammed algorithms can be selected with the mode button (see specifications).

Optional external battery voltage and temperature sensing via Bluetooth

A Smart Battery Sense, SmartShunt or a BMV-712 Smart Battery Monitor can be used to communicate battery voltage and temperature to one or more Phoenix Smart IP43 Chargers via [VE.Smart Networking](#).

Remote on-off

The remote on/off consists of two terminals: Remote H and Remote L. A remote on/off switch or relay contact can be connected between H and L. Alternatively, terminal H can be pulled high, or terminal L can be pulled low. See [manual](#) for details.

VE.Direct interface

For a wired data connection to a GX device such as the [Cerbo GX](#), PC or other devices. Also enables [Instant Readout functionality](#) via VictronConnect remotely from VRM. Please see the [VictronConnect app](#).

Programmable relay

Can be programmed using the VE.Direct interface or a Bluetooth enabled device to trip on an alarm or other events.

Synchronised charging

Pairing two or more Phoenix Smart IP43 Chargers in a VE.Smart Network, enables synchronised charging. This improves the charge efficiency and battery life.

Phoenix Smart IP43 Charger	12/30 (1+1) & (3)	12/50 (1+1) & (3)	24/16 (1+1) & (3)	24/25 (1+1) & (3)
Input voltage	85 – 250 VAC (full power from 100 VAC, startup from 90 VAC)			
DC input voltage range	90 – 375 VDC			
Frequency	45-65 Hz			
Power factor	1			
Back current drain	<1 mA			
No load power consumption	1 W			
Maximum Efficiency	95 %	94 %	96 %	96 %
Charge voltage - Absorption / Float / Storage	Normal: 14.4 V / 13.8 V / 13.2 V High: 14.7 V / 13.8 V / 13.2 V Li-ion: 14.2 V / N/A / 13.5 V		Normal: 28.8 V / 27.6 V / 26.4 V High: 29.4 V / 27.6 V / 26.4 V Li-ion: 28.4 V / N/A / 27.0 V	
Fully programmable	Yes, with Bluetooth and/or VE.Direct			
Maximum input current setting	3 – 10 A			
Number of battery connections	(1+1) models: 2 (2nd output via 2 pole terminal & 4 A max) (3) models: 3			
Charge current house battery	30 A	50 A	16 A	25 A
Low current mode	15 A	25 A	8 A	12,5 A
Temperature compensation - Default	-16 mV/°C		-32 mV/°C	
Charge current starter battery	4 A Max (1+1 output models only)			
Charge algorithm	6-stage adaptive (3 stage for Li-ion)			
Protection	Battery reverse polarity (fuse, not user accessible) / Output short circuit / Over temperature			
Can be used as power supply	Yes, output voltage can be set with Bluetooth and/or VE.Direct			
Operating temp. range	-20 to 60 °C (0 – 140 °F) Rated output current up to 40 °C, derate linearly to 20 % at 60 °C			
Humidity (non-condensing)	max 95 %			
Remote on/off	Yes (2 pole terminal)			
Relay (programmable)	Yes (SPDT - 5 A up to 250 VAC / 5 A up to 28 VDC)			
Bluetooth	Power: -4 dBm Frequency: 2402 – 2480 MHz			

ENCLOSURE

Material & Color	aluminium (blue RAL 5012)
Battery connection	Screw terminals 16 mm ² (AWG6)
AC-connection	IEC 320 C14 inlet with retainer clip (AC cord ordered separately)
Protection category	Electronic components: IP43 Connection area: IP22
Weight kg (lbs)	2,7 kg (6 lbs)
Dimensions (h x w x d)	180 x 249 x 116 mm (7.1 x 9.8 x 4.6 inch)

STANDARDS

Safety	EN 60335-1, EN 60335-2-29
Emission	EN 55014-1, EN 61000-6-3, EN 61000-3-2
Immunity	EN 55014-2, EN 61000-6-1, EN 61000-6-2, EN 61000-3-3
Vibration	IEC68-2-6:10-150Hz/1.0G

Retainer clip
(included)

Mains Cord CEE 7/7
(must be ordered separately)

Mains Cord NEMA 5-15P plug
(must be ordered separately)

Plug options:

Europe: CEE 7/7
UK: BS 1363
Australia/New Zealand: AS/NZS 3112
US: NEMA 5-15P

Charge curves: up to the gassing voltage (fig.1), and exceeding the gassing voltage (fig.2)
